A Magpie's Nest of Bookish TreatsBy bibliomane01"A History of Reading" is an eclectic collection of essays on books, bibliophiles, bibliophobes, bibliokleptomane, printing, translation, censorship, reading glasses and the Heian period in Japan. A browser's delight, it can also be devoured in a single sitting (guilty). From reading aloud to reading silently and from the physical pleasures of a book's shape, binding and smell to the less corporeal qualities of books that prompted Pinochet's Chile to ban "Don Quixote" as subversive, Alberto Manguel's bibliomane panorama is a thoroughly enjoyable celebration of one of life's greatest pleasures. In it, the reader will encounter Callimachus of Cyrene, who worked in the "vanished library" of Alexandria and laid the foundations for what we know today as the library catalogue; compare and contrast the differing approaches to public readings of Charles Dickens and Pliny the Younger; and decide once and for all whether it is preferable to read lying down or at a desk. This was far more interesting than I initially expected, and definitely worth reading.
