There are no page numbers, no index, no easily navigable links of any kind. If your assignments are given by page number, you'll be out of luck. It's such a broken document that it feels like using a pirated copy. There's also information missing! One great example, the word "wanax" - a term the Mycenaeans used to refer to the ruler of a palace-state - is on page 56 in the physical text book, but was either removed from this electronic version or the search function is too broken to find it. Don't waste your time or money fooling around with

this digital version, save yourself ~\$30 and buy the physical version the first time, or you'll be paying campus book store prices as you come to discover just how much important information was removed.
