A great read to study in the classroom, or in church.13 of 14 people found the following review helpful. Kemetan Cosmogony/ScienceBy CustomerThe late Dr.

Barashango is a learned man in the Afrikan Cosmogonical Sciences of the Ancients. The reader is given different theories of creation/origin of the world and mankind. His mission is not to convert anyone to a particular creed/doctrine but to enlighten the reader to different perspectives of Afrikan thought. I feel there is much to be learned from the Kemetan Cosmogony/Sciences of the Ancients which may aid and assist mankind in becoming one with the Universal Uncreated God, whom I refer to as Abba Yahowah. 1 of 1 people found the following review helpful. Five Stars By Robert Saunders Great quality!

Afrikan Genesis: Amazing Stories of Man's Beginnings presents some of the many remarkable ways our ancestors answered the eternal question, "Where did the world and human beings come from", and recounts these historical narratives in terms of today's Black Experience. *Afrikan Genesis* takes you on a wonderful journey to distant lands and places in days of yore when Black People were building magnificent kingdoms and civilizations all around the globe. Among the many marvels of those golden ages were the creative learning systems and High Culture symbolic languages developed by ancient Afrikan scientists. Through the reading of this book, you can learn how to properly interpret the language of their mystic symbols and how to apply its powerful principles to improve the quality of your personal and professional life.
