Carole E. Greenes, Rheta Rubenstein : Algebra and Algebraic Thinking in School Math: NCTM's 70th YB
before purchasing it in order to gage whether or not it would be worth my time, and all praised Algebra and Algebraic Thinking in School Math: NCTM's 70th YB:

0 of 0 people found the following review helpful. Class CanceledBy JamieI ordered this book for a class that ended up being canceled due to low enrollment. I hope that next time I sign up to take this class that this is still the book we are going to use. Although I have not looked through the book it came fast and was cheep!0 of 0 people found the following review helpful. good for secondary teachers, not so much for el edBy CustomerThis book is essential for secondary teachers of algebra, however, not exactly relevant for elementary teachers of algebra. Unfortunately, I got

stuck taking a graduate course for secondary algebra teachers, so this book is relevant for that purpose.

Algebra is no longer just for college-bound students. After a widespread push by NCTM and teachers across the country, algebra is now a required part of most curricula. However, students' standardized test scores are not at the level they should be. NCTM's seventieth yearbook takes a look at the status of algebra in our schools and the changes that the algebra curriculum has gone through over the past several years. Also included are successful classroom practices for developing algebraic reasoning abilities in students and for improving their overall understanding of the subject.
