EmhemerisBy Darci VelezA source for all who read the stars or seek to know what planets were in place on one's birth. I refer to this source often and do find errors from the computer generations to the hand written in many placements of one's moon sign. For those learning how to do hand created Natal's Charts it is a great source, though not including the rising signs, as it is for a single day and not seperated by every second hour of the twenty-four hour day. A must have.0 of 0 people found the following review helpful. Five StarsBy Ren-Jacques Webera good help for every astrologer who not only works online but also with printed stuff, thanks!
