Dated but still relevant By Art Vanderleigh This book provides an objective look at the regular people living in some of the Islamic cultures that are very mysterious to many Westerners. The section in Pakistan was enlightening. The author highlights a theme I have since seen reinforced in other books, which is that the concept of running a society based on Islamic principles is an idealistic vision that people will fight

for without ever giving serious thought to the practical challenges of such a system. The Qu'ran forbids the charging of interest on loans: how then to institute a banking system in a society governed by Islamic law? Naipul meets with an official grappling with this very problem when he visits Pakistan, and the problem is simultaneously bemoaned by one group and kicked down the road by another, to a future where people are "True Muslims" and such problems solve themselves. Naipul meets many people who are struggling to assimilate a very complex world into the very simple one revealed in a book. Their ultimate success or failure is left open ended, but Naipul is obviously pessimistic about their chances. I enjoyed reading this book for the insights it gave into the thinking of the people powering the Islamic revolutions and counter-revolutions in the Middle East. In some cases they slot with depressing ease into the cynical stereotypes I had of "faithful ignorant" types, and in others they have a complex understanding of the forces at work in their society. The reality of their situation makes them feel powerless to help themselves while their faith lets them feel optimistic about the future. I am giving this book four stars instead of five because in some places it was boring, but these places were rare and brief. 0 of 0 people found the following review helpful. Naipaul offers a unique voice, as Hindu born agonistic from the West Indies who balances a sympathetic yet critical perspective towards the people he encounters. While playing the devil's advocate to Western Civilization, he identifies the retrograde force of theocracy in the greater Asia. 0 of 1 people found the following review helpful. A Fantastic Book!! By Newton de Souza A must read for anyone willing to understand a society governed spiritually, socially and politically by Islam

Naipaul's controversial account of his travels through the Islamic world was hailed by The New Republic as "the most notable work on contemporary Islam to have appeared in a very long time."

"The edgy exactitude of Naipaul's writing is both effortlessly classical and yet at the same time brilliantly contemporary, as sharp and lucid as a spear of glass... He is inimitable, truly great and truly deserving of the Nobel' Observer From the Inside Flap Naipaul's controversial account of his travels through the Islamic world was hailed by The New Republic as "the most notable work on contemporary Islam to have appeared in a very long time."
