Robert Bwire : Ashes of Faith: A Doomsday Cult's Orchestration of Mass Murder in Africa before purchasing it in order to gage whether or not it would be worth my time, and all praised Ashes of Faith: A Doomsday Cult's Orchestration of Mass Murder in Africa:

It incisively describes a series of mass deaths in Uganda. When reports of the mass deaths in Uganda first appeared in local media, they were explained away as the work of some

religious fanatics. Bwire's engaging book exposes some details about the mass deaths that seem to confirm some original local suspicions that the deaths were mass murders which were being covered up. I found the book easy reading, engaging and show high quality of investigative journalism. But I also found the described events very disturbing. I am curious what you would say after reading it! It was very much worth my time and money! It is a must read especially for those with love for and who care about Africa and Uganda in particular.
