**Namrata Goswami : Asia 2030** before purchasing it in order to gage whether or not it would be worth my time, and all praised Asia 2030:

This book is an effort to understand how the future will unfold in Asia 2030. It is important to examine whether Asian states will continue with the present pace of their economic growth or lose momentum and undo the change occurring today at the regional and systematic level of international politics. This book addresses issues ranging from air power, cyber security, climate change, ballistic missile defense, to geopolitical and regional issues pertaining to East Asia, Southeast Asia, and South Asia. Based primarily on the method of scenario building, this book is an attempt to discuss the future of critical issues related to security and the international relations of Asia in 2030.

About the AuthorAjey Lele is research fellow at the Institute for Defense Studies and Analyses, New Delhi.
