Aspects of Western Civilization : Problems and Sources in History, Volume 1, 7/e, challenges students with basic questions regarding historical development, human nature,

moral action, and practical necessity. This collection of diverse primary sources explores a wide variety of issues and is organized around seven major themes: the Power Structure, Social and Spiritual Values, the Institution and the Individual, Imperialism, Revolution and Historical Transition, the Varieties of Truth, and Women in History.

**From the Back Cover** The seventh edition of *Aspects of Western Civilization* maintains balanced coverage of historical periods while restructuring several chapters and enhancing coverage in particular areas. It also offers additional pedagogical resources for the instructor and additional guidance for students. **Structural Changes:** There are two new chapters in Volume 2 designed to help students better understand the development of nationalism and subsequent political unification movements during the nineteenth century (*Paths of Glory: Napoleon and the Romantic Movement* and *Fatherland: The Power of Nationalism*). Chapter 10 (*Fin de Sicle: The Birth of the Modern Era*) has been restructured for greater continuity. There are also two new chapters added at the end of Volume 2 (*The Era of the Superpowers: Cold War Confrontation* and *The Dynamics of Change in the Contemporary World*) in order to expand coverage of the Cold War from 1945 to 1990 and to focus in greater detail on events in the contemporary world from 1990-2010.
