Civilization and European History and Civilization. Aspects of Western Civilization : Problems and Sources in History, Volume 2, 7/e, challenges students with basic questions regarding historical development, human nature, moral action, and practical necessity. This collection of diverse primary sources explores a wide variety of issues and is organized around seven major themes: the Power Structure, Social and Spiritual Values, the Institution and the Individual, Imperialism, Revolution and Historical Transition, the Varieties of Truth, and Women in History.

From the Back Cover The seventh edition of Aspects of Western Civilization maintains balanced coverage of historical periods while restructuring several chapters and enhancing coverage in particular areas. It also offers additional pedagogical resources for the instructor and additional guidance for students. Structural Changes: There are two new chapters in Volume 2 designed to help students better understand the development of nationalism and subsequent political unification movements during the nineteenth century (Paths of Glory: Napoleon and the Romantic Movement and Fatherland: The Power of Nationalism). Chapter 10 (Fin de Sicle: The Birth of the Modern Era) has been restructured for greater continuity. There are also two new chapters added at the end of Volume 2 (The Era of the Superpowers: Cold War Confrontation and The Dynamics of Change in the Contemporary World) in order to expand coverage of the Cold War from 1945 to 1990 and to focus in greater detail on events in the contemporary world from 1990-2010.
