1 of 1 people found the following review helpful. A simplistic introduction to the Druze faithBy A CustomerThe writings on the Druze faith are overwhemingly either distorted or incorrect. In addition to that, there are very few

books written on the Druze faith. This book shed some light on the spirit of the birth of the Druze faith, and its main architect, Hamza. It touches on some of its general concepts and traditions. However, this book is not to be taken as a reference, since it comes out at the end in the form of a story or even "tale". The language is also poor at best. The 4 stars are there to recommend one of the few books on the Druze faith that does not contain gross fallacies.

Author Moustafa F Moukarim goes into great detail about how Hamza recognizes the mind as the knowledge bank which makes humans the center of creation. In reference to our mighty and just creator Hamza concludes that God blessed us with our minds as a sparkle of His intelligence and also designated us to be the bearers of His message and custodians of all creation. In his words Hamza proclaims that religion should not be an implication or a suggestion. It is a reality and an understanding that should not be a burden. It is to emphasize the faithful dedication of the mind. As for the mind he describes it as having unparalleled power and energy and also as being incorruptible. It is not only as good as its creator but it will ultimately serve as our savior.
