From Brill : Isis En Occident: Actes Du Iihme Colloque International Sur Les Itudes Isiaqueactes Du Iihme Colloque International Sur Les Itudes Isiaques, Lyon III ... 2002 (Religions in the Graeco-Roman World,)

before purchasing it in order to gauge whether or not it would be worth my time, and all praised *Isis En Occident: Actes Du Iihme Colloque International Sur Les Itudes Isiaqueactes Du Iihme Colloque International Sur Les Itudes Isiaques, Lyon III ... 2002 (Religions in the Graeco-Roman World,)*:

In this volume, 16 contributions by specialists of political and religious history of Antiquity give a precious general overview of the diffusion of Egyptian cults in the West. The first part gives a very precise survey of the diffusion of Egyptian cults in the western Roman world, while the second part of the book is devoted to special fields usually considered as subsidiary (numismatics, lychnology, gemmology), but in fact essential for a better understanding of the success of the Isiac cults in the Graeco-Roman world between 330 BC and 400 AD.

About the Author Laurent Bricault, Ph.D. (1994) in Egyptology, Paris-Sorbonne, is the coordinator of different international projects concerning the Egyptian cults. He recently published an *Atlas de la diffusion des cultes isiaques* (Paris, 2001) and *Recueil des Inscriptions concernant les cultes isiaques* (Paris, 2003).
