Henri Stierlin : Islam (World Architecture) before purchasing it in order to gage whether or not it would be worth my time, and all praised Islam (World Architecture):

Bauhaus before bauhausBy Martyn Richard JonesIf ever there was a collection of artefacts that proves the sayings "Less is more" and "God is in the details" then it has to be the collection of architectural jewels found here in this beautifully illustrated overview of early Islamic architecture. It shows the domination of geometric art and form, light and space that typifies the brilliance of early Islamic architecture. It's a great coffee table book, and something to inspire, educate and inform as well as to soothe, relax and dream of. regards, martyn_jones@iniciativas.com2 of 3 people found the following review helpful. Nice for travelers and studentsBy Vladyslav SerdyukI have been to most of the counties which have monuments described in this book. It is nice to have some copies from it when you are visiting any site and read it there. You will understand much more than your traveling guide can inform you. Also it is good for student who study Islamic culture and history

This volume is an impressive survey of more than 600 years of Islamic architecture, from the seventh to the thirteenth centuries, in a region stretching from the Near and Middle East to Sicily, the Maghreb and Andalusia. It presents masterpieces of Islamic architecture from the peerless Dome of the Rock in Jerusalem to the mysterious Umayyad palaces in the deserts of Syria and Palestine, from the sumptuous residences of the caliphs in Samarra and Saragossa to the Great Mosques of Damascus, Kairouan and Cordoba.
