M. C. Ricklefs : Islamisation and Its Opponents in Java: A Political, Social, Cultural and Religious History, c. 1930 to the Present before purchasing it in order to gage whether or not it would be worth my time, and all praised Islamisation and Its Opponents in Java: A Political, Social, Cultural and Religious History, c. 1930 to the Present:

The Javanese - one of the largest ethnic groups in the Islamic world - were once mostly 'nominal Muslims', with pious believers a minority and the majority seemingly resistant to Islam's call for greater piety. Over the tumultuous period analyzed here - from colonial ruler through Japanese occupation and Revolution to the chaotic democracy of the Sukarno period, the Soeharto regime's aspirant totalitarianism and the democratic period since - that society has changed profoundly to become an extraordinary example of the rising religiosity that marks the modern age. Islamisation and Its Opponents in Java draws on a formidable body of sources, including interviews, archival documents and a vast range of published material, to situate the Javanese religious experience from the 1930s to the present day in its local political, social, cultural and religious settings. The concluding part of the author's monumental three-volume series assessing more than six centuries of the on-going Islamisation of Javanese, the study has considerable relevance for much wider contexts. Beliefs, or disbeliefs, about the supernatural are important in all societies, and the final section of the book, which considers the significance of Java's religious history in global contexts, shows how it exemplifies a profound contest of values in the universal human search for a better life.

If for no other reason than the pleasure of enjoying this fruit of sovereign scholarship, this clearly written and thoroughly argued text is well-worth reading. . . . it invites new ethnography that deeply understands the rapid and radical changes in culture and society during the Soeharto and post-Soeharto periods.-- "International Association of Asian Studies" If for no other reason than the pleasure of enjoying this fruit of sovereign scholarship, this clearly written and thoroughly argued text is well-worth reading. . . . it invites new ethnography that deeply understands the rapid and radical changes in culture and society during the Soeharto and post-Soeharto periods.
