From Janes Information Group : Jane's All the World's Aircraft 2011-2012 before purchasing it in order to gage whether or not it would be worth my time, and all praised Jane's All the World's Aircraft 2011-2012:

0 of 1 people found the following review helpful. Good product, price acceptable but not for condition it arrived inBy James L. SpingarnI wrote a review in which I rated the seller's service and product at 3 stars. I think I was a bit harsh. The book is excellent as are all of the Jane's All the World's Aircraft volumes. They delivered it reasonably quickly, too.My complaint was the packaging was insufficient and impractical for a 6.8 pound book. It was in a manila-type envelope lined with thin bubble wrap. This through shipment, no doubt, and the weight of the contents, had it corners badly "bumped" and the envelope was torn in several places. As it was advertised as "like new," in shrink wrap which had been cut at top to put in a stamp, and otherwise in excellent condition, I expected a \$399 item (my basic cost plus

postage) not to be damaged. I consider that it was damaged and requested that thought be given for an adjustment on the price charged. I still consider that fair and reasonable. I love the book, but think that the seller could have done better and am happy with the product but not its condition. Jim Spingarn 0 of 0 people found the following review helpful. Planes, planes, planes By Vanhouten WPI Incredible creatures from the whole world which were flying over our heads without we knew it, put in a heavy book. Thousands of worlds and nearly as many descriptions with the most secret details, accompanied by fine pictures of the in- and outside of the different aircraft, make this book (yearly) a must for everyone who looks sometimes above when (s)he thinks to hear a not very musical sound. 0 of 0 people found the following review helpful. Five Stars By mbjornen Simply the best source of detailed technical information for aircraft enthusiasts

This aviation reference provides exhaustive technical detail on over 1000 civil and military aircraft currently being produced or under development by over 560 companies. Complete with photographs and line drawings to aid recognition and comparison.
