Brian Levack, Edward Muir, Meredith Veldman, Michael Maas : The West: Encounters Transformations, Volume 2 (since 1550) (2nd Edition) (MyHistoryLab Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised The West: Encounters Transformations, Volume 2 (since 1550) (2nd Edition) (MyHistoryLab Series):

2 of 2 people found the following review helpful. Fantastic textbookBy BookwormThis textbook is not only written in a conversational tone which holds the reader's attention, but it brings in art, personalities of historical figures, and other tidbits to enhance a student's learning experience. The illustrations used are fantastic and can spur students to delve further into many subjects. History should be exciting as evidenced by this book!2 of 2 people found the following review helpful. Good TextbookBy Emily M. BakerBought this for my Humanities I class. It has helped me

understand some of the events we talk about in class and the geography of the regions we're studying. 0 of 1 people found the following review helpful. not the best
By Kevin I have to say I didn't enjoy this book in certain areas. It gives you a few examples of what may have happened and what may have influenced the spread of Christianity. I don't find that to be accurate when it seems the author is trying to lead you down a certain path instead of giving you the evidence

The West: Encounters Transformations takes a new approach to telling the story of Western Civilization. Rather than looking at Western Civilization only as the history of Europe from ancient times to the present, this groundbreaking book examines the changing nature of the West how the definition of the West has evolved and transformed throughout history. The text presents a balanced treatment of political, social, religious, and cultural history and emphasizes the ever-shifting boundaries of the geographic and cultural realm of the West. Overview of Western Civilization. Readers interested in the history and development of Western Civilization.

"I enjoyed every page and could hardly put it down." Patricia Ali, Morris College "I am impressed by the cultural encounters approach that this textbook uses. Showing the various forces of history will help students understand how everything in history meshes together into a giant story, instead of just being a jumble of facts." Leonard Curtis, Mississippi College "The authors are absolutely right-on when they argue that the west is an idea shaped by cultural encounters...this is the only way that western civilization courses can be taught in the 21st century." Bryan Ganaway, University of Illinois at Urbana-Champaign "The author(s) have done an outstanding job of writing a text that is...lucid...and comprehensive." Sharon L. Arnoult, Midwestern State University "Too many texts are afraid to be interesting, engaging or to tell a good story...this textbook provides comprehensive coverage of events and also tells some good stories, nice to see that this can be done in a textbook today. This is the kind of textbook that helps make a course interesting, helping professors who have trouble being lively and supporting those who try to engage students with good stories based in different methods, countries, and areas of interest." Patrick Holt, Fordham University "The writing style is friendly, warm, and persuasive. Students will want to read these chapters and continue reading them." Theodore M. Kluz, Troy State University "Finally, a textbook for Western civilization courses that uses modern, clear language without distorting the record of the past, that combines forceful interpretation with the 'facts' and that marries brevity to faithfulness to history! The 'encounters' theme is a most effective pedagogical method, and is in keeping with the approach of the West being a cultural construct. This is an innovative approach, appropriate for today's students living in our global world." Arthur H. Auten, University of Hartford
From the Back Cover
The West: Encounters and Transformations, Second Edition, Volume I Brian Levack With 32 additional maps, The West: Encounters and Transformations, Second Edition, Atlas Edition, helps students with geography, one of the most difficult aspects of Western Civilization courses for many. Four-color and outline maps accompanied by review questions call on students to identify important geographical areas and think critically about the connection between geography and historical events. The maps are on perforated pages and are organized by chapter so that they can be easily assigned and collected. Here is a sample of the maps included: Greece and Greek Colonies of the World, ca. 431 BCE The Career of Julius Caesar The Expansion of Islam in the 7th and 8th Centuries The Expansion of the Ottoman Empire Trade Routes to Asia Europe under Absolute Monarchy, 1715 A complete listing of the maps appears at the front of this book.
