before purchasing it in order to gage whether or not it would be worth my time, and all praised The World Almanac and Book of Facts, 2007 (World Almanac and Book of Facts):

You've seen all the praises of this inexpensive reference work and do not need my two-cents.For over fifteen-years I taught GED classes, which one time contained students speaking fourteen different languages. The World Almanac

and a thesaurus were our workbooks. We were librarians moonlighting in a night school near an Air Force base without a budget for teaching materials. From "The World Almanac" we taught our students how to write term papers with outlining and to do the necessary research; we taught them the pertinent information they required to pass both their citizenship questions and the GED test for their high school diploma. The GED test contains four sections: English, Math, Science and Social Studies/Humanities. During those years we never sent a student to their examination who didn't perform with excellence. After a few years our successes came to the attention of the examiners; they began sending us candidates who didn't make it with instructions "to get in our classes and stay there" until we said they were ready. Since that time, I've taught the staff of every library where I worked to use this volume and to reach for it first, when confronted with a reference question. It still works; the Internet maybe more fashionable, but its consistent accuracy is questionable. For authors, this is the must have book within reach of their computer, it is invaluable. Excellent As Usual By Dan D About every three years or so, I buy a new World Almanac. Since I was a kid, there's always been one around the house. I'll admit that when I sit on the throne, I like to read it. All kinds of facts and figures to learn. As a sports fan, I like to reminisce about my favorite baseball/football teams and superstars. Whenever anyone starts giving me facts off the top of their head, I usually refer to the Almanac to verify the information to see if it's factual. Every household should have one. 0 of 0 people found the following review helpful. Five Stars By G. Ramsey All in all a good product
