5 of 5 people found the following review helpful. New methods, new insights. By svein Harald Gullbekk A magistral discussion of cosmology in prehistorical and medieval societies from a professor of archaeology that has worked the field for many years. Interdisciplinary approaches provide new and useful insights through the use of archaeological evidence and narrative sources. A must read for anyone interested in the Old Norse society and religion. Dr. Svein H Gullbekk

The study of Old Norse religion is a truly multidisciplinary and international field of research. The rituals, myths, and narratives of pre-Christian Scandinavia have been studied and interpreted in detail relying mainly on Christian Icelandic literature from the Middle Ages. Here, Anders Andrén offers a long-term perspective on Old Norse cosmology and argues that the fundamental ideas of an ordered universe, time, and space in Old Norse religion can be studied in a dialogue between archaeology and the Icelandic narrative tradition. Ideas about the world tree, middle earth, and the sun can be traced in images and material culture from Scandinavian prehistory. By combining the prehistoric representations with the later written record the author presents a fresh and nuanced study of the fascinating Old Norse world.

About the Author Anders Andrén is professor of archaeology at Stockholm University. He was formerly professor of medieval archaeology at Lund University, and has also been a visiting scholar in Athens, Cambridge, Copenhagen, Heidelberg, Sydney, and Uppsala.
