U2 : U2 - The Piano Collection before purchasing it in order to gauge whether or not it would be worth my time, and all praised U2 - The Piano Collection:

By ABaxter There are several great piano compositions here, but I was expecting a little larger selection, especially the songs they did in concert in 2015 like 'Every Breaking Wave' and 'California'. There is a pretty good selection amongst albums, i.e. they used at least one composition from each album, except maybe from "Pop", the band's experimental phase. Overall, I'm looking forward to testing these on the piano electronic keyboard to see what sounds I can get out of them, 0 of 0 people found the following review helpful. Nice Selection By R. Weston I like this songbook. It has a nice variety of U2 songs and the arrangements are well done. I use Band In A Box software to provide the accompaniment and play the lead on piano, organ, guitar or other using my Korg synthesizer. Even without the vocals the melodies retain their U2 sound. 0 of 0
