Required reading for our timeBy Werner CohnThe New York Times of October 26, 2002 tells us, in a front-page story, that "Anti-Semitic 'Elders of Zion' Gets New Life on Egypt TV." So now, almost 60 years after the downfall of Hitler, his favorite book and his favorite mania are once more resurrected. What to do ? The first thing surely is to consult the most scholarly study of the topic, by a namesake of mine (but no relative). I first purchased this volume in a Pelican edition back in 1976. Since then I have read much on the notorious "Protocols," but nothing else can compare to this outstanding treatment by one of the great historians on the 20th century.38 of 47 people found the following review helpful. One excellent book.By A CustomerThis book is more than a simple history about the Protocols of the Elders of Zion, it is a very interesting way to understand how fanatics and crazy men move peoples and countries to hate and kill another people. The title of this book is very explicit : " Warrant for Genocide ".The exposition of the book is very clear, from first times of cristianism when the antisemitism started to our days, when still today groups of new nazis or fascists , including Ku-Klux-Klan and skin heads , believe in one imaginary " secret jewish world government ". Nietzsche wrote : " But the clown imagen of these sick spirits, of these paranoic of ideas, influences over the mass. Humanity prefers see stupids faces rather than to hear reasons ". Great !!!, Nietzsche wrote this 50 years before Hitler spechees.Precisally Protocols of the Elders of Zion are a perfect example about how supertision, fanaticism, no tolerance, can influence to people to kill or at least to be partner of the crime. Today we know that even Catholic Chrch cooperate with nazis and keep a ciminal silence about all the germans crimes. And the cristian bases of antisemitism, is more clear reading this book, in fact, the first " discover " of Protocols of the Elders of Zion was Sergey A. Nilus, a cristian priest.One of the principals points of view of this book is how people don`t think, don`t analize, don`t see, people just " believe " in a blind way. For exampe, was stupid the nazi believing that Elders of Zion cause the First World War and the germany defeat, this war was a product of complex socials, economic and politics conditions. But fanatics don`t understand real causes. Or to say that Russian Revolution was " moved " by jewish people, in reality jewish people suferred under comunist government and Soviet Union allways helped to arab nations trying to destroy Israel. Stalin himself ordered to kill jewish revolutionaries like Trosty. But we return to beginning " Humanity prefers see stupids faces rather than to hear reasons ".Finally, my advice is not just read, is to study this amazing book. THIS BOOK IS A MEDICINE AGAINST FANATISM .Please excuse my wrong writting of English, regards

Norman Cohn explores the origins of one of the most pernicious forgeries ever created, the supposed 'Protocols of the Elders of Zion', a manuscript purporting to detail a Jewish conspiracy to control the world once the most published text after the Bible.

From Publishers WeeklyThe myth of Jews as children of the Devil, mysterious, uncanny and possessed of sinister powers, has persisted since the second century, when they were accused of killing Christian children, torturing the consecrated wafer and poisoning wells. In his history of the demonizing of Jewry, British academic Cohn (The Pursuit of the Millennium), describes the modern adaptation of that myth as promulgated through the turn-of-the-century forgery "Protocols of the Elders of Zion." This document was purported to plan Jewish domination of the globe through control of political parties, banks, the press and public opinion, "casting a net of gold and steel around the world." Although soon to be proven a blatant hoax by the Berne trial in 1935, the "Protocols" sold 120,000 copies in Germany in one year and helped convince 17 million Germans to vote Nazi in 1933. Cohn shows how the fiction of a Jewish conspiracy then combined with volkisch-racist ideology to produce the Holocaust: civilization needed to be rescued from this dark, earthbound race by the "world of good, of light, incarnated in blond, blue-eyed people" marching under the sun-god's symbol, the swastika. This, Cohn argues, with convincing evidence, was the justification used for murdering two thirds of all the Jews in Europe. Long out of print, Cohn's book, complete with a new afterword and extended extracts from the "Protocols" in the appendix, is a well-documented, accessible introduction to a key factor in the history of the Holocaust. Though a fake, the Protocols nonetheless was at the root of a great deal of anti-Semitism in Europe and elsewhere and was quite popular in the Third Reich.
