By Andrew Etchen
Great quality book. The binding is superb, and paper quality is top notch.

The book focuses on one of the most remarkable phenomena of World War II: the mass participation of women, including numerous female combatants, in the communist-led Yugoslav Partisan resistance. Drawing on an array of sources - archival documents of the Communist Party and Partisan army, wartime press, veteran reminiscences, and Yugoslav literature and cinematography - this study explores the history and postwar memory of the phenomenon. More broadly, it is concerned with changes in gender norms caused by the war, revolution, and establishment of the communist regime that claimed to have abolished inequality between the sexes.

"Meticulously researched and convincingly argued, this is a fascinating and important story long in need of serious examination - important for its contribution not only to Yugoslav and women's history but also to literature on modernization, comparative communism, and gender and war. I look forward to assigning it!" Carol Lilly, Director of International Studies Program, Eastern Europe, Russian, and Soviet History, University of Nebraska, Kearney
"Batini breaks new ground in this engaging historical analysis of gender as a critical organizing principle of the Yugoslav partisan movement and the communist system the partisans built. The product of extensive archival research and rich theoretical insight, this book challenges the existing historical narratives of World War II in Yugoslavia, and our understanding of the relationship between gender identity and war." Malgorzata Fidelis, University of Illinois, Chicago
"Batini has authored a compelling book that reveals the pervasiveness of gender norms and the power of traditional culture. The success of the Partisan Army relied heavily on the incorporation of gender norms and manipulation of local traditions into its ideology to achieve the mass mobilization of the peasants. However, even in the midst of a war for survival, with institutional support for gender equality, the daily practice of gender inequality continued to occur. Batini honors the memory and sacrifice of these brave women. Much can be learned through this study of the partizanka, from how and why she was created and empowered to how and why she was forgotten." H-War
About the Author
Jelena Batini is currently a Fellow in the Thinking Matters Program at Stanford University, California. She is a historian specializing in modern Eastern Europe, World War II and gender history. Her work has been published in edited volumes and journals including the Journal of International Women's Studies and the Journal of Women's History. She has been a Mellon/ACLS Recent Doctoral Recipients Fellow and Postdoctoral Fellow in Stanford University's Introduction to the Humanities Program.
