Lydia Mihelic Pulsipher, Alex Pulsipher : World Regional Geography: Global Patterns, Local Lives before purchasing it in order to gage whether or not it would be worth my time, and all praised World Regional Geography: Global Patterns, Local Lives:

2 of 2 people found the following review helpful. Good Presentation...By PurchaserThis book does well presenting information, however the wording throughout the book, especially regarding US foreign policy, was very biased. While the information is not incorrect, it certainly clearly displays the writers' political opinions on geopolitics and the like. I am a student taking a geography class, not a government class, and while I understand that 'world' geography and politics tend to go hand in hand, I really don't appreciate reading through passages clearly biased, whether I agree with that bias or not.0 of 0 people found the following review helpful. Great qualityBy CustomerIt is what I needed, a good price, and was in great condition!0 of 0 people found the following review helpful. Five StarsBy William WiseGood textbook.

Alone among books for the regional geography course, Pulsipher and Pulsiphers World Regional Geography

humanizes geographical issues, showing how larger geographical forces affect the lives of individuals and communities around the globe. Students explore the field's defining concepts by focusing on the stories of real people, global trends and interregional linkages, and contemporary topics that transcend regional borders (the war on terrorism, global political order, interregional trade, the global economy, popular culture, the environment, and the Internet). Along with a thorough updating, this edition introduces several new features that will help students explore geography across regions, while enhancing the book's standing as the most highly visual textbook for the world regional course. In addition, W. H. Freeman is proud to announce LaunchPad for Pulsipher/Pulsipher, World Regional Geography, the only online course/homework system for geography to feature adaptive quizzing via Freeman's highly acclaimed LearningCurve.

About the Author Lydia Mihelic Pulsipher is a cultural-historical geographer who studies the landscapes of ordinary people through the lens of geography. She has contributed to several geography-related exhibits at the Smithsonian Museum of Natural History in Washington, D.C., including "Seeds of Change," which featured her research in the eastern Caribbean on human adaptation to the Neotropics in the post-Columbian period, including the present. She and her graduate students have also looked at cultural geography and national/ethnic identity issues in the new Central European members of the European Union, and at the impact of tourism development on traditional landscapes in these countries. In January, 2009, Dr. Pulsipher was awarded the Preston E. James Eminent Latin Americanist Career Award, by the Conference of Latin Americanist Geographers, for work on the cultural and environmental geography of the Eastern Caribbean and Latin America, and public outreach through collaborations with the Smithsonian Institution and the Seeds of Change exhibit. Alex A. Pulsipher is an independent scholar in Knoxville, TN, focusing on urban development, sustainability, and global environmental change. In the early 1990s, Alex spent some time in South Asia working for a development research center and then went on to do an undergraduate thesis on the history of Hindu nationalism at Wesleyan University. Beginning in 1995, Alex worked full time on the research and writing of the first edition of World Regional Geography. In 1999 and 2000, he traveled to South America, Southeast Asia, and South Asia, where he collected information for the second edition of World Regional Geography and for the website. In 2000 and 2001, he returned to writing material and designing maps for the second edition. In 2010, he earned a masters degree in Geography from Clark University, where he studied the diffusion of green technologies in the context of environmental change."
