This book is the Second Volume by this author that recounts the history of women who served in combat during World War Two (WW II). This is a not well known aspect of WW II history of great interest to me and a subject that needs to be known by many American readers! Human history provides many accounts of women who actively participated in warfare. Western Culture however, dominated by the Christian Dogma of original sin and hierarchical notions of a male dominated society has traditionally cast women in the role of the weaker sex and nurturer, with a life focused on child birthing and rearing, maintenance of the home and religious obligation This book chronicles the stories of four women; Noor Inayat Khan, Krystyna Starbek, Virginia Hall, and Pearl Witherington, all who actively fought in a combatants' role during WW 2. Each put their lives on the line for their countries! The author's descriptions of their bravery, daring, and sacrifices rival those of any male! Their stories are those of heroes that deserve to be known and appreciated by all!!!

Great Stories of the Brave Women of WWIIBy trekker
Another great book by Cyrus J. Zachary. In Vol 2 Mr. Zachary continues to bring to life the stories of the heroic women of WWII. I like that he is concise with his story telling giving you background information on the women briefly like giving you a synopsis of how they grew and then spending the remainder of their story telling you about their brave actions. If it wasn't for these brave women many of our downed fliers would not have lived and that includes my own father who was shot down over Germany. He was finally captured and spent the remainder as a POW. However one of my father's crew did make it back on foot to England, I wonder if Virginia Hall's was one of the people that helped them. Regardless, hers is a name I will remember. I'm glad Mr. Cyrus is telling these stories so they don't get lost in the annals of time. We will remember

Only 57 pages. Very oddly written, as though English may be the author's second language. Covers the subject very superficially. May be okay for young readers. Feel the description of the book was misleading. Definitely not worth \$8.99.

Incredible Stories And Accounts Of World War 2 Women Spies, Heroes And Informers... Clichéd though it may be, a human being's true strength of character is reflected in the most difficult of times. The world had to sit up and take note of just how strong a woman could be when the two world wars hit. Even taking the side of the traditionalists, one could deny that women were as important to the war as men were. This so-called weaker sex had to fight their own battles within their homes their husbands, fathers and brothers went to face the enemy on the front lines while they fought tooth and nail to keep the family running. And still more women went to the actual battlefield itself! Women had a unique advantage over the men; they could blend into the background seamlessly, precisely because of the prevalent sexist attitudes of the times. Their bravery, their self-sacrifice and their daring cannot be forgotten, for without them, the War could have been lost and the world we live in today could be a very different place. This book chronicles the stories of four such women Noor Inayat Khan, Krystyna Starbek, Virginia Hall and Pearl Witherington all of whom put their lives on the line for their countries. They made no apologies or excuses about who they were and quietly went about changing the face of the war, helping the Allied Powers take on the power-crazed men of Nazi Germany and come out victorious.
