This is a revised and updated edition of "The Yachtsman's Eight Language Dictionary". It still contains the original eight Western European languages, but has been expanded to include Greek and Turkish. The languages it covers are English, French, German, Dutch, Danish, Italian, Spanish, Portuguese, Turkish and Greek. More than 600 additional items have been incorporated in this edition, to cater for developments in electrical, electronic and mechanical equipment, and taking into account the predominance of fibreglass boats, thus creating a language dictionary which is designed to be of use to yachtsmen travelling overseas.

What's the French term for a diesel glow plug? What's the Dutch word for a winch handle? The answers are in this book. (Soundings: An Interdisciplinary Journal) If you're planning to cruise abroad you'll want this book on board. It's a multilingual dictionary that covers cruising terms in English, French, German, Dutch, Danish, Italian, Spanish, Portuguese, Turkish, and Greek. It covers all the subjects the boater might need including words for several thousand onboard items. (Latitudes Attitudes) Let's face it: the lexicon of yachting is tough enough in the native tongue. So, it strikes us as particularly brilliant that we can now cruise the world and be prepared to say seacock, halyard, or I need a tow in French, German, Dutch, Danish, Spanish, Italian, Portuguese, Turkish, and Greek. ... The book has also kept pace with innovations in the boating world and the labeled drawings of sailing rigs will be particularly helpful if you should find yourself capsized in Copenhagen, stern-to in Sardinia, or dead reckoning near Dominica. (Yachting World) About the Author Barbara Webb is an experienced sailor and writer. She prepared this new edition with the assistance of the Cruising Association, respected worldwide.
